

HEAVY-DUTY FREIGHT DOORS --- TECHNOLOGY OPTIMIZATION

Heavy-duty freight doors technology optimization:

Modify the reinforcing brackets on the both sides of the heavy-duty doors, adding reinforcing brackets for guide rail in the middle, adding heavy-duty lifting hole on the upper supporting plate, specifying motor use.

Optimization effect:

Modify and add the reinforcing brackets to avoid the whole droop phenomenon of operator and hanger after long-term use, furthermore, improve whole strength of the system. Add lifting hole make on-site installation more convenient, at the same time, motor's specification reduce product power consumption.
